

PRESS RELEASE

ANTARES VISION GROUP LISTS ON FTSE ITALIA MID CAP INDEX

Travagliato (Brescia), 2 September 2021 - Antares Vision Group, a leading global provider of hardware and software Track & Trace solutions (anti-counterfeiting and supply chain transparency) and one of the major players in inspection systems (quality control) and in smart data management (maximized production efficiency and end-to-end digitalization of the supply chain, from raw materials to the final consumer), announces that, from Monday 20 September 2021, its ordinary shares (MTS: AV, ISIN IT000536660) will be included in the FTSE Italia Mid Cap index.

The FTSE Italia Index Series Technical Committee approved the listing on the index, which encompasses the top 60 Italian companies by market capitalisation not included in the FTSE MIB index, at its periodic quarterly review of the basket and was achieved after Antares Vision' shares met strict free float and liquidity requirements.

Emidio Zorzella, chief executive officer of Antares Vision Group stated: "the listing on the FTSE Italia Mid Cap index just a few months after entering the Star Segment, is an important step and places Antares Vision Group in the top one hundred listed Italian companies by stock market value. We are convinced that this will contribute to further boosting our share base and the Group's visibility, benefiting all of our stakeholders."

Even after the promotion to the new index, Antares Vision Group will continue to be a part of the STAR Segment, as well as the FTSE Italia All-Share and FTSE Italia STAR indices.

ABOUT ANTARES VISION GROUP

Listed since April 2019 on the Italian Stock Exchange in the AIM Market, and from 14 May 2021 on Mercato Telematico Azionario (MTA) STAR segment, the **Antares Vision Group** guarantees protection of **products, people and brands** through **inspection systems** for quality control, **Track & Trace solutions** for anti-counterfeiting and supply chain transparency, **smart data management** tools for maximized efficiency and digitalization of the supply chain, from raw materials to the final consumer.
